63.7(g)	No	Yes	Subpart T specifies what is required to demonstrate idling emission stant and compliance through the use of the Environmental Protection Agenc test method 307 and control device monitoring. Reports and records a testing and monitoring are required for compliance verification. Thre runs of the test are required for compliance, as specified in § 63.7(e) a subpart A.
63.7(h)	No	No	Subpart T does not require the use of a performance test to comply wit the standard. §63.480 Applicability and designation of affected sources.

- (a) Definition of affected source. The provisions of this subpart apply to each affected source. Affected sources are described in paragraphs (a)(1) through (a)(4) of this section.
- (1) An affected source is either an existing affected source or a new affected source. Existing affected source is defined in paragraph (a)(2) of this section, and new affected source is defined in paragraph (a)(3) of this section.
- (2) An existing affected source is defined as each group of one or more elastomer product process units (EPPU) and associated equipment, as listed in paragraph (a)(4) of this section, that is not part of a new affected source, as defined in paragraph (a)(3) of this section, that is manufacturing the same primary product and that is located at a plant site that is a major source.
- (3) A new affected source is defined by the criteria in paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section. The situation described in paragraph (a)(3)(i) of this section is distinct from those situations described in paragraphs (a)(3)(ii) and (a)(3)(iii) of this section and from any situation described in paragraph (i) of this section.

- (i) At a site without HAP emission points before June 12, 1995 (i.e., a "greenfield" site), each group of one or more EPPU and associated equipment, as listed in paragraph (a)(4) of this section, that is manufacturing the same primary product and that is part of a major source on which construction commenced after June 12, 1995;
- (ii) A group of one or more EPPU meeting the criteria in paragraph (i)(1)(i) of this section; or
- (iii) A reconstructed affected source meeting the criteria in paragraph (i)(2)(i) of this section.
- (4) Emission points and equipment. The affected source also includes the emission points and equipment specified in paragraphs (a)(4)(i) through (a)(4)(iv) of this section that are associated with each applicable group of one or more EPPU constituting an affected source.
 - (i) Each waste management unit.
 - (ii) Maintenance wastewater.
 - (iii) Each heat exchange system.
- (iv) Equipment required by, or utilized as a method of compliance with, this subpart which may include control devices and recovery devices.
- (5) EPPUs and associated equipment, as listed in paragraph (a)(4) of this section, that are located at plant sites that are not major sources are neither affected sources nor part of an affected source.
- (b) EPPUs without organic HAP. The owner or operator of an EPPU that is part of an affected source, as defined in paragraph (a) of this section, but that
